Instituto Tecnológico de Estudios Superiores de Monterrey

## Education

---

Bachelor of Science in Computer Technologies (BCT), graduating in December 2017.

### Academic Qualifications.....

<b>Tecnológico de Monterrey</b>	<b>Monterrey, México</b>
<i>Cumulative GPA of 98/100</i>	<i>2013–2017</i>

<b>Carnegie Mellon University</b>	<b>Pittsburgh, Pennsylvania</b>
<i>Cumulative GPA of 4.0/4.0</i>	<i>Exchange Student for Spring and Fall 2016</i>

<b>Highschool</b>	<b>México</b>
<i>Cumulative GPA of 9.8/10</i>	<i>2010–2013</i>

## Work Experience

---

None.

## Selected projects

---

<b>Event Promotion website</b> (January – May 2015, ITESM)	<i>Ruby, Rails</i>
------------------------------------------------------------	--------------------

- Developed for the database course, it was made in collaboration with a team from 9<sup>th</sup> semester.
- Acted as Scrum Master (for part of the team), programmer and quality manager.
- Currently running in one of the university's servers.

<b>Survival single-player videogame</b> (April – May 2015, ITESM)	<i>Java</i>
-------------------------------------------------------------------	-------------

- Developed to use auto-generated levels and environments in order to improve player experience.
- Acted as team leader, concept designer, and programmer.
- Developed with JFrame, it can be downloaded and played at [GitHub](#).

<b>Data analysis and visualization framework</b> (March - April 2016, CMU)	<i>Java</i>
----------------------------------------------------------------------------	-------------

- Developed for course 15-214, it was awarded best framework of the course of Spring 2016.
- Created with JFrame and provided with a user – friendly interface. It was made general enough to support a large array of user – made plugins with graph capabilities.

<b>Multiplayer online tank videogame</b> (March - April 2016, CMU)	<i>Python, Django</i>
--------------------------------------------------------------------	-----------------------

- Developed for course 15-437 as the final project, recognized as one of the best of Spring 2016.
- Implemented with user profiles and tank customization; for a more realistic experience it uses Box2d physics engine alongside the HTML5 canvas and JQuery.
- Deployed on Heroku and Amazon AWS, currently available at [this site](#).

## Selected computer languages and systems

---

**Proficient or better in:** Java, C++, Python, SQL, JavaScript, Haskell; Android, Django, L<sup>A</sup>T<sub>E</sub>X, and Git.

## Selected Academic Honors

---

**ITESM** High Academic Achievement Award 2014.

**CMU** Named to the Dean's List of the School of Computer Science (Spring 2016).

**Other** First place in Highschool and second place in Junior Highschool.
